## Design & Engineering Service

Over 100+ Years of combined engineering experience in the development of rail products and systems

Our professional engineers have a wealth of global railway knowledge and experience. By growing their experience in the rail industry for many years, our engineering team have the expertise to meet the requirements demanded by the industry standards, our customers and the Safety Approval Authority.

By developing new systems and products from design concept through to in-service maintenance; our engineers work closely with, and help guide our customers throughout the development life cycle.

Rowe Hankins Ltd. is committed to continual improvement, development and growth with a complete understanding of their customer, end-user and future rail market requirements.

This can assist with obsolescence replacements, upgrades or a totally new product. From concept, design, test to manufacture, Rowe Hankins can be your design partner.
